

Lets Build Club

In construction club the children have had so much fun doing something different each week! In week one, we came up with different ideas and themes we would like to try throughout our time in construction club - the list included making slime, competitions, marshmallow building, making robots and much more. We have made robots out of junk modelling resources, we had a tallest tower competition where we drew our designs and then built the towers, we made glittery scented slime which was so much fun and we have even done building outside in the sunshine using our wooden outdoor construction resources and plastic crates - one group made a role play movie theatre where we could all sit down. The children have developed their imagination and team building skills each week.
