

How to upload a picture onto the learning platform.

Get to the signposts in the learning platform (link on the webpage). From here click on your child's year group sign.

Go to the left hand side and look for "our photos" - the picture link on the right does not work at the moment!

This will open a page that should have some folders in. Choose the folder where you want the file to go—for example, the year one plant challenge will go in the plant challenge folder for either 1JS or 1KG.

Open the folder by clicking on it...

Now you can upload your file.

Click on 'upload file' selected from your computer.

The file should now appear in the folder.
